1310nm TX / 1490 nm RX****1. SCOPE**

The ZFTBBBB3149A2ST Small Form Factor Pluggable (SFP) transceiver module is specifically designed for the high performance integrated duplex data link over single-mode. These transceiver modules are compliant with the SFP Multisource Agreement (MSA). With the hot plug ability, these modules offer an easy way to be installed into SFP MSA compliant ports at any time without the interruption of the host equipment operating online. The 1G BiDi SFP transceivers using a long wavelength (1310nm) FP laser diode enable data transmission up to 20km on a single-mode (9/125µm) optical fiber.
